

# HELLO!

My name is **Shawn Huynh** and I'm a multi-disciplined and energetic individual with a strong passion in software development. As a self-starter in front-end web development and programming, my strengths include adept analytical and problem solving skills, highly adaptable and a quick study. As a seasoned engineering project manager, I bring along the ability to foster lasting client relationships and successful cradle-to-grave project oversight under various collaborative and independent environments.

### professional experience

**GHD Inc.**  
Project  
Coordinator/  
Manager

2008

- Oversaw unique and conventional municipal infrastructure designs of residential and commercial developments.
- Recommended engineering solutions that prevented significant future delays, environmental and social impact, and upwards of \$1.0M in costs.
- Reported directly to the President, assembling complex and detailed financial cost distribution calculations, schedules, analyses and reports for significant residential, commercial and industrial landowner groups.
- Co-authored environmental infrastructure and development planning documents which were incorporated into Provincial policies.

**Mattamy Homes**  
Project  
Coordinator

2005

- Managed the full life-cycle of multiple residential and commercial developments.
- Prepared and reviewed detailed financial cash-flow, forecasting, and development plans.
- Reduced costs and expedited homebuyer delivery through prompt response, problem solving unexpected issues, and diligent follow-up.
- Advanced government approval of a commercial property and averted potential consequences of delayed property closings.
